DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

In claim 24, line 9, the occurrence of "a first request message" seems to refer back to "a first request message" as recited in line 4. If this is true, it is suggested to change "a first request message" to --the first request message--.

In claim 24, line 11, the occurrence of "a first response message" seems to refer back to "a first response message" as recited in line 6. If this is true, it is suggested to change "a first response message" to --the first response message--.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

2. Claims 1-27 are allowed.

As per claims 1-27, the prior art fails to teach the combination of having the first squelch table being free from any squelch entries when it receives a squelch entry from the first channel of the first cross-connection, then generating the first

squelch entry, then sending a request message to the second node, and having a response message being received within a predetermined period of time and then processing the information according to the first response message.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Neuendorff; Keith Eric et al. (US 6657969 B1), Fatehi; Mohammad Taghi et al. (US 6600581 B1), and Nagahama, Yuichi (US 20030012142 A1) are all cited to show a system and method which is considered pertinent to the claimed invention.
